

Florida Driver's License and ID Card Information

Florida joined the Records and Information from DMVs for E-Verify (RIDE) program in December 2012 for driver's licenses and ID cards. When an employee presents a Florida driver's license or ID card as his or her List B document for Form I-9, E-Verify will prompt you to enter the document information and will verify it against Florida records.

- Select "Driver's license" as the document name in E-Verify for any Florida document called a **Driver License, Learner License, or CDL**.
- Select "ID card" as the document name in E-Verify for any Florida document called an **Identification Card**.
- Florida driver's licenses have yellow, blue, or green headers, while ID cards have red headers.
- Florida issues horizontal driver's licenses and ID cards for individuals age 21 and over and issues vertical driver's licenses and ID cards for individuals under age 21.
- A driver's license or ID card labeled "Temporary" in red is a valid List B document for Form I-9.
- Florida driver's licenses and ID cards contain document numbers (circled below) that are 13 alphanumeric characters (letters and numbers). The format is one letter followed by 12 numeric characters. All Florida driver's licenses and ID cards include expiration dates.
